Drone Roof Documentation & Damage Analysis

High-resolution roof inspections for roofers, contractors, restoration pros & insurance adjusters — captured safely from the air. **No ladders. No fall risk. No one on the roof.**

I'm a local FAA Part 107 certified drone pilot based in Dover, NH. I capture complete, high-resolution documentation of a roof and its trouble spots — the detail you need to build an accurate estimate, support an insurance claim, or market a finished job — and deliver it fast.

WHAT I DOCUMENT

- Every roof plane, ridge, hip & valley
- Roof-to-wall intersections
- Step, counter & base flashing
- Chimney flashing & crickets
- Skylights, vents & penetrations
- Drip edge & rake edges
- Signs of water infiltration & staining
- Shingle condition, lifting & granule loss
- Trim, soffit & fascia
- Gutters & downspouts
- Storm, hail & wind-damage indicators
- Ponding / drainage on low-slope roofs

DAMAGE & WARNING-SIGN ANALYSIS

I know the warning signs that matter and how to document them so anyone on your team can act. Failed or lifted flashing, compromised roof-to-wall intersections, water-entry points, deteriorated sealant, and early-stage damage that's easy to miss from the ground — each finding is captured up close and clearly labeled.

WHAT YOU GET

- High-resolution aerial photos — full roof plus close-ups of every problem area
- 4K video walkaround
- Organized, labeled photo-documentation package
- Fast turnaround — typically next business day
- Bonus: clean marketing content of finished jobs

WHY IT WORKS FOR YOU

- No ladders, no fall risk, no liability
- Faster, more accurate estimates
- Claim-ready documentation for adjusters
- Impress clients & win more bids
- A second set of expert eyes on every roof

HOW IT WORKS

1

Book a quick flight

A 20–30 minute site visit — I handle FAA airspace clearance and safety.

2

I document from the air

Full roof plus close-ups of every trouble spot. No ladders, no one on the roof.

3

You get your package

High-res photos, 4K video & a labeled report — typically next business day.

NEW-CUSTOMER FIRST FLIGHT — \$150

See exactly what you'd get before booking a full job. Roof documentation from \$225. Full rate sheet at northeast-uav.com/rates.html
